

Do our Echotex® banners last as long as conventional nylon banners? See for yourself!

The Bill Reid street banners on Hornby Street in Vancouver were installed in November 2008. They were digitally printed on Echotex®, the only 100% Recycled Fabric made specifically for street banners.

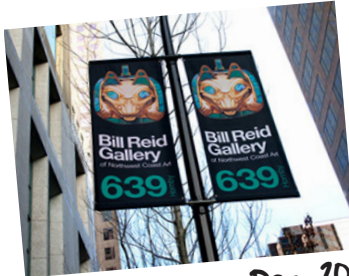

After 22 months, the banners look almost new. Municipalities and BIAs can “Go Green” without compromising quality or paying too much. It’s a win-win, for you - and for the environment!
